

PRASHANT KUMAR

Bangalore, Karnataka, 560107

+91 7004970006 mishraprashant2002@gmail.com [linkedin](#) [github](#)

PROFESSIONAL SUMMARY

- Dynamic software developer with hands-on experience at STACKPRO, specializing in full-stack development. Achievements include enhancing user interfaces, and effectively resolving complex issues to ensure high performance and reliability. Collaborates seamlessly with cross-functional teams, utilizing expertise in React.js and AWS Cognito to deliver scalable solutions tailored to client requirements.

EDUCATION

Acharya Institute of Technology

Bachelor of Engineering (B.E) Computer Science and Engineering (CGPA 8.4)

Bangalore, Karnataka

Dec. 2021 – Present

Higher Secondary Education

Class XII PCM (Aggregate:84)

Ranchi, Jharkhand

2018 – 2020

EXPERIENCE

AI Systems Engineer (LLM & Agent Orchestration)

DentalX - Claims Automation Platform

Feb 2026 – Present

Bangalore, India

- Architected and developed an AI-powered claims automation platform using FastAPI with LLM-driven multi-agent orchestration.
- Designed and implemented specialized AI agents for end-to-end claim lifecycle: auto-validation, data correction, claim submission, manual review routing, and patient outreach workflows.
- Built agent orchestration layer enabling dynamic tool-based execution (10+ tools) integrating BigQuery, FHIR APIs, external services, and document retrieval systems.
- Developed RAG-based decision system using Vertex AI Search to analyze policy documents and route claims for automated processing or manual review.
- Implemented voice-based patient outreach agent using Twilio and ElevenLabs for automated payment reminders and interaction workflows.
- Built secure multi-tenant architecture with role-based access control, audit logging, and fault-tolerant API integrations (retry/backoff, idempotency).

Software Engineer

CyborgIntell — Product Configurator , AR App

Aug 2025 – Jan 2026

Bangalore, India

- Led development of a platform for converting ML pipelines into deployable applications with end-to-end lifecycle tracking.
- Built multi-step UI workflows to visualize pipeline creation, build status, and deployment metrics.
- Implemented cross-application communication using iframe and postMessage for secure data exchange between micro-apps.
- Developed interactive dashboards using ApexCharts/Recharts for monitoring model health and performance.
- Improved developer experience with exportable project configs and reproducible deployment workflows.

Full-Stack Developer

SaiShiko

May 2025 – Aug 2025

Bangalore, India

- Developed a full-stack survey and analytics platform using React.js and Django REST Framework.
- Implemented role-based authentication and secure email login workflows with automated notifications.
- Built survey lifecycle workflows and reporting pipelines for capturing and analyzing user responses.
- Developed interactive dashboards with filtering, drilldowns, and export capabilities.
- Integrated third-party APIs and implemented Celery-based background processing for scalability.

Frontend Developer

CaseX

Feb 2025 – May 2025

Bangalore, India

- Developed a crime-reporting platform with guided multi-step workflows and chat-based reporting interface.
- Built geolocation-based UI for incident mapping and metadata capture.
- Implemented secure file upload flows for evidence with preview and validation.
- Designed intuitive user flows optimized for high-stress reporting scenarios.

SDE Intern

Sep 2024 – Jan 2025

CyborgIntell (MRM, MLFlux, ODA, Loan-Collection)

Bangalore, India

- Developed reusable UI components and improved frontend stability across multiple enterprise modules.
- Extended visual workflow builders using React Flow with custom nodes and dynamic interactions.
- Built analytics dashboards using ApexCharts/Recharts for monitoring system metrics.
- Improved performance using lazy loading, memoization, and optimized state handling.

PROJECTS

Bharat Briefs — AI News Aggregator App

- Built an AI-powered news aggregation platform that fetches articles from multiple sources and generates concise 3-point summaries for quick consumption.
- Implemented LLM-based summarization pipeline to convert long-form news into structured 3 bullet-point insights across multiple languages.
- Developed categorized news feeds (e.g., politics, business, tech) with support for multilingual content delivery.
- Designed interactive features allowing users to share opinions on news and engage with community-driven discussions.
- Built trending system to surface popular topics based on user interactions and engagement signals.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, React Native (Expo), Angular, Material-UI, Tailwind CSS, React Flow

Backend: Django REST Framework (DRF), FastAPI, Node.js, Express.js, REST API Design, Authentication & Authorization (JWT, OAuth2)

AI & ML Systems: LLM Integration (Gemini, Claude), RAG Systems (Vertex AI Search), Multi-Agent Architectures, Prompt Engineering, Tool-based Agent Orchestration

Databases & Data Systems: PostgreSQL, MongoDB, MySQL, Redis, Google BigQuery

Cloud & DevOps: AWS (EC2, S3, Cognito), Google Cloud (Cloud Run, Vertex AI), Docker, CI/CD Basics

APIs & Integrations: FHIR APIs, Third-party API Integration, Webhooks, Async Processing (Celery, Background Tasks)

Tools: Git, GitHub, Postman, VS Code, EAS Build
